Key Parameter	List	Tuple	Set	Dictionary
Type of DS	Non-homogeneous	Non-homogeneous	Non-homogeneous	Non-homogeneous
Storing	Columns of single row or multiple rows	Columns of single row or multiple rows	Single Row	In the form of key value pairs
Representation	[]	()	{}	{}, key – value pairs are separated with :
Ex.	[1,2,3,5]	(1,2,3,4,5)	{1,2,3,4,5}	{'AP':Amaravati,'TS':Hyd'}
Allows duplicate elements are not	Allowed	Allowed	Does not	Kes must be unique but values may be duplicate
Nesting is allowed?	Allowed [1,2,3,4,[5,6,7]]	Allowed (1,2,3,4,(5,6,7))	Allowed {1,2,3,4,{5,6,7}}	Allowed {'India':'Delhi',states= {'AP':'Amaravati','TS':'Hyd' 'Tamilnadu':'Chennai'}}
Creation can be done with built-in function?	list()	tuple()	set{}	dict()
Ordered or not?	Ordered	Ordered	Unordered	Ordered
How to create an empty?	L=[]	T=()	S=set()	D={}
